SUMMARY

Results-driven Java Full Stack Developer with 2 years of professional experience in designing, developing, and maintaining scalable web applications. Proficient in Java, Spring Boot, MySQL, JavaScript, TypeScript, React.js, Angular, HTML5, CSS3, and SCSS, with strong expertise in developing responsive and user-friendly frontend interfaces and robust backend services. Seeking a challenging opportunity to leverage my full-stack development skills, contribute to high-quality software solutions, and grow as a technology professional while delivering measurable value to the organization.

SKILLS

- **Programming Languages:** Java, JavaScript, TypeScript
 - **Frontend:** React.js (Redux), Angular, HTML5, CSS3, SCSS, Material UI, Tailwind
 - **Backend:** Spring Boot, MySQL
 - **Tools & Others:** Git, GitHub, VS Code, Eclipse, Postman
 - **Soft Skills:** Problem Solving, Team Collaboration, Adaptability, Communication
-

WORK EXPERIENCE

Tata Consultancy Services (TCS)

SEP 2024 - Present

Point of Sale (POS) Application

- Contributed to one of the organization's largest frontend initiatives, leading UI migration efforts that modernized legacy interfaces into responsive React.js components.
- Built and maintained scalable, reusable UI components using React.js, JavaScript, HTML, and CSS, improving development velocity across the team.
- Collaborated with backend teams to integrate REST APIs, ensuring seamless data flow between frontend and services.

Self-Checkout (SCO) System

- Delivered core self-checkout features including configuration management, bottle fee handling, gift receipts, and loyalty integration using React.js.
- Led UI design and implementation for key customer-facing checkout flows.
- Converted the React.js web application into a native Android APK using Capacitor, gaining hands-on experience with Android Studio and ADB.
- Diagnosed and resolved critical production issues in a cross-platform (web-to-native) environment.

Warehouse Management System — Endpoint Reliability Monitor

- Built a real-time monitoring dashboard for a Warehouse Management System, tracking the health and uptime of critical backend endpoints.
- Implemented automated polling to check endpoint status every 5 seconds, ensuring near real-time visibility into system reliability.
- Developed automatic email alerting to notify the team instantly when an endpoint went down, reducing response time to outages.
- Designed and built the frontend dashboard UI to visualize live endpoint status, uptime trends, and failure history.

WORK EXPERIENCE

Backoffice Web Application

- Led UI migration of a legacy backoffice system, independently ramping up on Angular and SCSS as new technologies.
- Rebuilt key interface modules to align with modern frontend standards.

Crochet Store E-Commerce Platform (Personal/Business Project)

- Building a full-stack e-commerce application using React.js and Spring Boot for a small business client.
 - Designing product catalog, cart, and order management features from the ground up.
-

EXPERTISE

- **Full Stack Development:** End-to-end design and development of web applications using Java, Spring Boot, and React.js/Angular.
 - **Frontend Engineering:** Building responsive, reusable UI components with React.js (Redux), Angular, HTML5, CSS3, and SCSS.
 - **UI Migration & Modernization:** Leading legacy-to-modern frontend migrations (Angular, React.js) with a focus on performance and user experience.
 - **REST API Integration:** Designing and consuming RESTful services to connect frontend applications with backend systems.
 - **Cross-Platform Development:** Converting web applications into native Android builds using Capacitor; custom plugin development and ADB debugging.
 - **Database Management:** Working with MySQL for data modeling and backend persistence
 - **Performance Optimization:** Improving application responsiveness through component-level and rendering optimizations.
-

ACCOMPLISHMENTS

- Recognized among the top entries in TCS Idea Igniter, an organization-wide innovation program, for submitting a successful and impactful idea.
 - Played a key role in the UI migration and redesign of one of TCS's largest frontend projects, modernizing legacy screens into responsive React.js components.
 - Independently built and shipped a full-stack compliance and support ticketing system (Spring Boot + React.js) during training, enabling structured complaint and suggestion handling.
 - Converted a React.js web application into a fully functional Android application using Capacitor, including writing custom native plugins — a self-driven upskilling effort beyond the core role.
 - Diagnosed and resolved critical production issues in the Self-Checkout (SCO) system.
 - Proactively upskilled in Angular and SCSS to take ownership of the Backoffice UI migration, despite no prior experience in either technology.
-

EDUCATION

Bachelor of Computer Applications (BCA)

2021 - 2024

New Prince Shri Bhavani Arts & Science College, Chennai

Percentage - 80%

CERTIFICATIONS

- Spring Boot Crash Course — Udemy
- JavaScript Essentials — LinkedIn Learnings
- Java Programming — Udemy
- TCS Idea Igniter — Recognized among top entries for innovative thinking and successful idea submission.
